Help... Nature

Babies and children need proper food, rarely ever medicine. If they do not thrive on their food something is wrong. They need a little help to get their digestive machinery working properly.

SCOTT'S EMULSION OF COD LIVER OIL
WITH HYPOPHOSPHITES OF LIME & SODA

will generally correct this difficulty.

If you will put from one-fourth to half a teaspoonful in baby's bottle three or four times a day you will soon see a marked improvement. For larger children, from half to a teaspoonful, according to age, dissolved in their milk, if you so desire, will very soon show its great nourishing power. If the mother's milk does not nourish the baby, she needs the emulsion. It will show an effect at once both upon mother and child.

You Do, or You Don't Need Glasses

The eye being a rather delicate organ, great care should be exercised in the selection of proper glasses. Many believe that glasses should be resorted to only when the sight becomes so defective as not to be able to do without. This is a great mistake which must be combatted. Whenever there is unmistakable evidence of the need of their aid, they should be used. A neglect of this rule sometimes produces mischief which results in serious trouble if the course be persisted in.
